MIDI In/Out One of the key features of Cubase is the capability to send MIDI messages to other software on your system. All Sonible plugins include a built-in MIDI input and output. This includes a built-in standalone module. In addition, all plugins include an onboard option, which is used to control external hardware. The Sonible R2R Plugins include a standalone module. This allows Sonible to connect and control external hardware. The SyXIn and SyXOut modules are used to control external instruments, effects, instruments or controllers. As with all Sonible products, the SyXIn and SyXOut modules are fully customizable. A.I. powered plugins The Sonible A.I. powered plugins feature the A.I. engineers at sonible having access to SyXIn and SyXOut modules. This allows the A.I. engineers at sonible to provide the best performance and usability of the A.I. versions of the SyXIn and SyXOut plugins. The A.I. version of the SyXIn and SyXOut plugins can be used in a way that allows for several options for different situations. The R2R SmartComp, SmartEQ and SmartComp3 offer several options.
